

Issue 1: Implementation of Test Does Not Match Description

File with Error:

CypressAllure\cypress\e2e\tests\myAccount.test.ts

Expected Result:

The test must cover 'My Account Functionality' but currently, it does not test anything. It merely opens Google.

Issue 2: Locators Are Not Extracted to Constants

Files with Errors:

cypressAllure\cypress\e2e\pages\loginPage.ts

cypressAllure\cypress\e2e\pages\myAccountPage.ts

Example Error:

```
get signinLink() { return cy.get('.login') }
```

Expected Result:

```
const signinLinkLocator = '.login';
```

```
get signinLink() { return cy.get(signinLinkLocator) }
```

Issue 3: Repeated Use of the Same Test Data

File with Error:

cypressAllure\cypress\e2e\tests\login.test.ts

Example Error:

```
loginPage.login("testautomation@cypresstest.com", "Test@1234")
```

Expected Result:

Use several sets of random valid credentials.

Example Error:

```
loginPage.login(this.data.invalid_credentials.invalid_email.emailId,
```

```
this.data.invalid_credentials.invalid_email.password)
```

Expected Result:

Use several sets of random invalid credentials. Instead of hardcoded data, use an external package like faker or write a custom random generator.

Issue 4: Redundant Files Created by Framework or Reporter

Folder with Error:

cypressAllure\docs

Expected Result:

There should be no test results in the repository containing tests.

Issue 5: Unnecessary Comments in Code

File with Error:

cypressAllure\config\config.config.ts

Example Error:

```
// We've imported your old cypress plugins here.
```

```
// You may want to clean this up later by importing these.
```

Expected Result:

Remove unnecessary comments from the code.

Issue 6: Use of Console Log Instead of Verification

File with Error:

cypressAllure\cypress\e2e\tests\myAccount.test.ts

Example Error:

```
console.log("This is a sample test")
```

Expected Result:

Replace console.log with proper verification. In Cypress, use should.
